PROFESSIONAL SUMMARY

Full-Stack Developer with 5 years of software development experience (4 years in React.js, Next.js, TypeScript, Node.js, Express.js, and MySQL; 1+ year in Java 8 and Spring Boot for banking). Skilled in REST APIs for web and mobile apps, JWT and OAuth2 authentication, RBAC, Stripe subscription payments, OpenAI/LLM API integration, and AWS (EC2, S3) deployment in Agile/Scrum teams.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router, SSR, SSG, ISR), TypeScript, JavaScript (ES6+), Redux Toolkit, TanStack Query (React Query), Context API, React Hooks, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design

Backend & APIs: Node.js, Express.js, Java 8, Spring Boot, RESTful APIs, JWT, OAuth2, Role-Based Access Control (RBAC)

Integrations & AI: Stripe Billing and Webhooks, OpenAI / LLM API Integration, Prompt Engineering, Google Drive API

Databases & Cloud: MySQL, Relational Schema Design, Query and Index Optimization, AWS (EC2, S3), Render, CI/CD Deployment

Tools & Workflow: Git, GitHub, Maven, Webpack, Vite, Postman, FileZilla, Jira, Agile, Scrum, SDLC, REST API Testing

WORK EXPERIENCE

Full-Stack Developer | Wegile Pvt. Ltd. | India

Nov 2024 - Present

Project 1: PulseFit - Fitness Dashboard and Subscription Platform | Technologies: React.js, TypeScript, Redux Toolkit, Node.js, Express.js, MySQL, Stripe API, AWS (EC2, S3)

- Built a responsive fitness management dashboard using React.js, TypeScript, and Redux Toolkit with full-stack modules to create and manage Programs, Workouts, Single Workouts, Exercises, and personalized Diet Plans.
- Engineered copy-and-paste functionality to deep-clone entire programs, nested workout sessions, and movements across schedules, and implemented AI-powered program generation that creates complete workout sessions, cutting setup time by 50%.
- Designed and developed scalable Node.js, Express.js, and MySQL RESTful APIs with high availability and schema validation to serve both the web admin dashboard and the PulseFit mobile application.
- Developed the standalone PulseFit subscription webpage integrated with the Stripe API for plan selection, checkout, and recurring billing.
- Implemented program export features and media upload workflows using AWS S3, with backend services deployed on AWS EC2.

Project 2: Phormation - Fitness Management and Community Platform | Technologies: React.js, Node.js, Express.js, MySQL, Mobile RESTful APIs

- Built and managed React.js fitness dashboard modules for programs, workouts, exercises, and diet plans, alongside complete user management and real-time user subscription status tracking and lifecycle administration.
- Designed and developed Node.js and Express.js RESTful APIs for the Phormation mobile application to support workout delivery, complete user account management, and subscription status synchronization.
- Engineered mobile community and moderation features, including user comments, nested comment replies, and user blocking workflows.

Full-Stack Developer | Tissa Technology | India

Oct 2023 - Oct 2024

Project: SKPearls - E-Commerce Platform for Pearl Jewellery | Technologies: Next.js, TypeScript, TanStack Query, Tailwind CSS, Node.js, Express.js, MySQL, AWS (EC2, S3)

- Developed a production e-commerce platform with Next.js, TypeScript, and Tailwind CSS storefronts and Node.js and Express.js RESTful APIs covering product discovery, dynamic filtering, cart, checkout, and admin order fulfillment.
- Optimized MySQL queries and database indexing for multi-attribute product filtering and inventory tracking, reducing search query latency by 40%.
- Implemented JWT and OAuth2 authentication, Role-Based Access Control (RBAC) middleware, and request validation to secure customer checkout and admin operations.

- Configured AWS S3 for product media delivery and deployed application services on AWS EC2 with Next.js asset optimization, improving page load speed by 35% and lowering mobile bounce rates.
- Managed server state and caching with TanStack Query for optimistic cart updates, multi-step checkout validation, and error handling.

Frontend Developer | Labhanya Infotech | India

Sep 2022 - Aug 2023

Project: Data Builder - AI Task Management System | Technologies: React.js, TypeScript, Redux Toolkit, Bootstrap, LLM API, Google Drive API

- Built a collaborative AI task-management web application using React.js, TypeScript, and Bootstrap with interactive task boards, automated workflows, and responsive dashboards, improving team task tracking efficiency by 30%.
- Integrated Python-based LLM APIs, browser voice-to-task capture, and Google Drive API file uploads on the frontend.
- Secured REST API integrations with JWT authentication, client-side RBAC route protection, loading states, and error-state handling.
- Refactored UI components and state architecture using Redux Toolkit and custom React Hooks for scalable state management.

Project: POS - Restaurant Management System | Technologies: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, RESTful APIs

- Developed responsive Point-of-Sale (POS) frontend modules for live billing, kitchen order management, stock tracking, analytics dashboards, and customer loyalty workflows.
- Built responsive React.js views and REST API integrations for POS terminals, reducing average cashier checkout time by 25%.
- Created reusable table and modal components and streamlined data flow to keep the UI responsive during peak restaurant hours.

Junior Software Developer | Labhanya Infotech | India

Jul 2021 - Sep 2022

Project: FinCore - Digital Banking Application | Technologies: Java 8, Spring Boot, MySQL, Maven, RESTful APIs, JWT, Postman, Git

- Developed and maintained banking application modules for customer registration, KYC verification, Savings and Current account management, fund transfers, and account statement generation using Java 8, Spring Boot, and MySQL.
- Built backend business logic, custom exception handling, and validation rules for balance checks and money transfers.
- Created and tested RESTful API endpoints for Bank, Customer, Account, Login (JWT), and Transaction controllers using Postman.
- Optimized MySQL queries and table indexes for transaction history lookups, reducing statement generation time by 35%.

PROJECTS

Test Forge AI - AI-Powered Automated Test Case Generator

Technologies: React.js, Next.js, TypeScript, Tailwind CSS, Node.js, Express.js, MySQL, OpenAI / LLM API, Render

- Developed a full-stack application that parses user requirements and generates structured functional, boundary, edge-case, and negative test cases using Node.js, Express.js, and OpenAI/LLM APIs.
- Built a responsive React.js and Next.js (TypeScript) UI with real-time streaming generation, inline review and editing, MySQL persistence, and one-click export, reducing manual test-case writing effort.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Jun 2021

Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur, Maharashtra, India
